1. Check before use

1) Package Contents

b. Check the product if it has a broken part.

b-1. Weld line can be created on the product but it is not a defect.
Rest assured and use it.

b-2. Check if there are three O-rings at the inside of the buttons and two O-rings at the inside of the housing.

1. Check before use

2) Waterproof test before use

a. Follow the instructions for the test.

a - 1.

Before use, test the housing without the smartphone with the enough amount of water that can fully soak the housing.

❖ During test, recommend NOT to put the tissue or cotton. If you run the test with the tissue or cotton, make sure it is not jammed in.

❖ Check whether O-ring has popped up or squashed and has other particles between the O-ring and housing.

a - 2.

After the test, wipe the outside of the housing with a towel and check if water has gone inside of the housing.

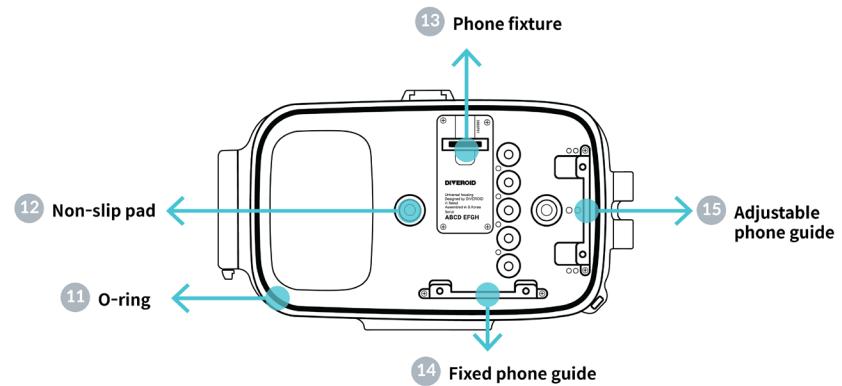

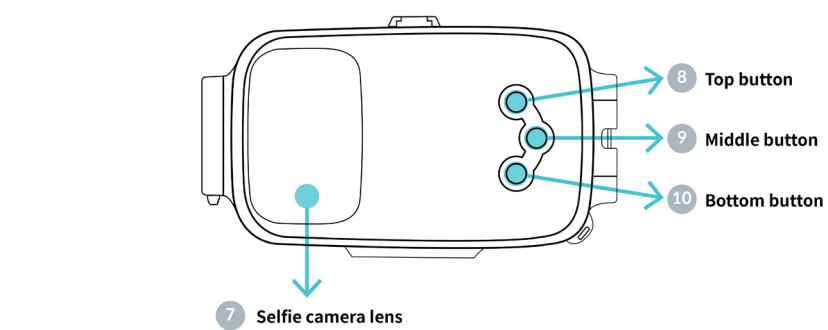

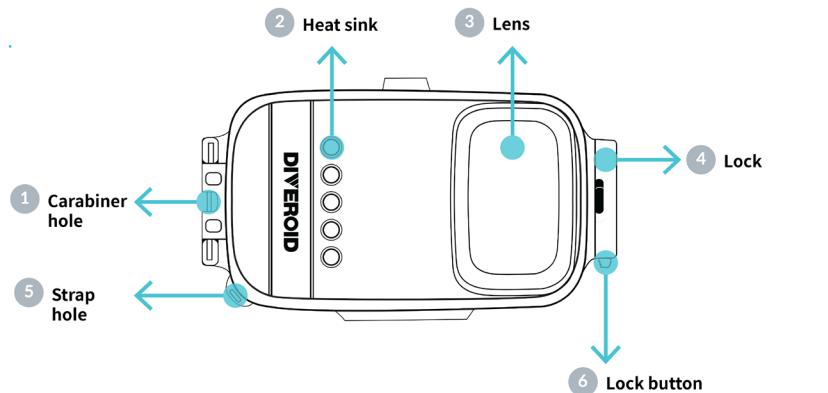

a- 3.

If there is evidence of water penetration, contact [Customer center](#).

❗ All of the DIVEROID housings are sold after taking strict waterproof test during the manufacturing process. If the smartphone gets waterlogged during diving, compensation is not available. Please run the waterproof test before use and request change/refund during the product warranty period (within 3 months) if there is a defect.

2. Product details

1) Part names
